

2. Catering Reservation and Ordering System

I create website using HTML, CSS, JAVASCRIPT.

1. Header Section

•**Purpose:** Creates a consistent navigation bar across the website.

•**Features:**

- **Logo:** Displays the company logo with a rounded style for branding.
- **Navigation Menu:**
 - Links to **Home**, **Menu**, **Profile**, **Login**, and **Register** pages.
 - Helps users navigate the website seamlessly.

2.Home Section

•**Purpose:** Acts as a hero section to welcome users.

•**Features:**

- **Headline:** Introduces the theme with "Explore Authentic Indian Catering."
- **Description:** Briefly highlights the services with "Delicious, hand-crafted food from the heart of rural India delivered globally."

4. Image Slider

•**Purpose:** Showcases key visuals of the catering services.

•**Features:**

- Displays a rotating set of images such as "Welcome Feast," "Signature Dishes," "Event Catering," and "Happy Customers."
- Provides an engaging user experience and conveys professionalism.

Your Cart

Place Order

192.168.63.184:5500 says

Thank you for your order!

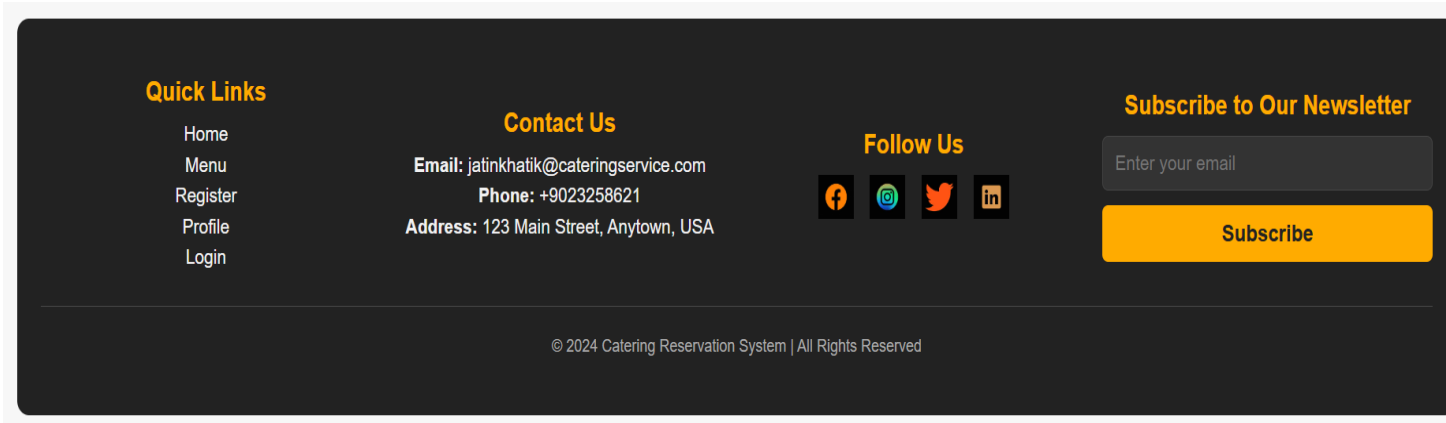

OK

5. Order Confirmation Animation

•**Purpose:** Confirms order placement visually and textually.

•**Features:**

- Displays the message "Your order has been placed successfully!" for user satisfaction.

JavaScript Integration

- Purpose:** Adds interactivity to the website.
- Features:**
 - Smooth scrolling for navigation links using script.js.
 - Any additional interactive features like dynamic effects or animations.

Footer Section

- Purpose:** Provides quick access to additional information and actions.
- Features:**
 - Quick Links:** Reiterates key navigation links for user convenience.
 - Contact Information:**
 - Email: jatinkhatik@cateringservice.com
 - Phone: +9023258621
 - Address: 123 Main Street, Anytown, USA
 - Social Media Links:**
 - Provides links to platforms like Facebook, Instagram, Twitter, and LinkedIn with appropriate icons.
 - Newsletter Signup:**
 - Allows users to subscribe by entering their email address.
 - Footer Bottom:** Displays copyright information.

Edit Your Details

Name:

Email:

Phone:

Profile Picture: No file chosen

Key Highlights:

Global Reset:

A clean reset ensures consistency across browsers.

Responsive Design:

Media queries adapt the layout for devices of different sizes.

Header and Navigation:

Styled with a background color, padding, and rounded corners.

Links are styled and include hover effects.

Hero Section:

Centralized text with a visually appealing background and button hover effects.

Menu Section:

Grid-based layout for items, responsive across screen sizes.

Includes hover effects for interaction.

Cart Section:

Styled with flexbox for layout alignment.

Includes buttons with hover effects for interaction.

Slider:

Uses keyframes for smooth animations transitioning between slides.

Footer:

Modern design with sections for social media, links, and a newsletter form.

Styled hover effects for interaction.

Animation:

Subtle animations like fadeInOut and button transformations enhance interactivity.

Profile Page:

Flexbox ensures alignment and spacing between elements.

Includes editable sections with forms for updates.

•Menu Initialization:

- loadMenu dynamically generates the food menu items.
- It ensures that the menu-items container exists before proceeding.

•Cart Management:

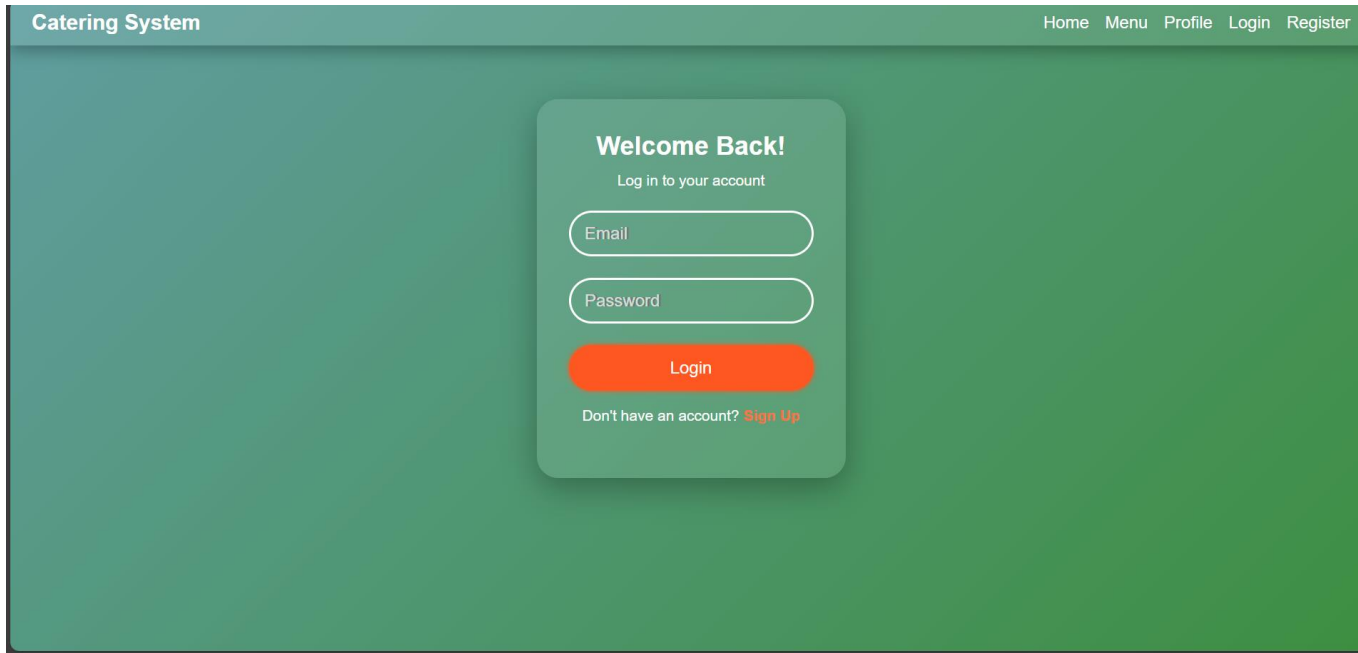

- Items can be added using addToCart, which updates the cart and displays a message.
- The cart content is displayed dynamically using showCart.
- Items can be removed from the cart via removeFromCart.

•Order Placement:

- A visual confirmation (order-animation) is triggered upon clicking "Place Order."
- Ensures proper fallback in case of missing HTML elements.

•UI Interactions:

- User-friendly alerts and DOM updates for an interactive experience.

Slide 1: Login Page Overview

Navbar Features

Logo: Links to the homepage.

Navigation Links:

Home: Redirects to homepage.

Menu: View available dishes.

Profile: Access user profile.

Login: Current page.

Register: Sign-up for a new account.

Interactive Behavior: Links change color on hover for better user experience.

Login Form Features

Title and Instructions:

"Welcome Back!" message for users.

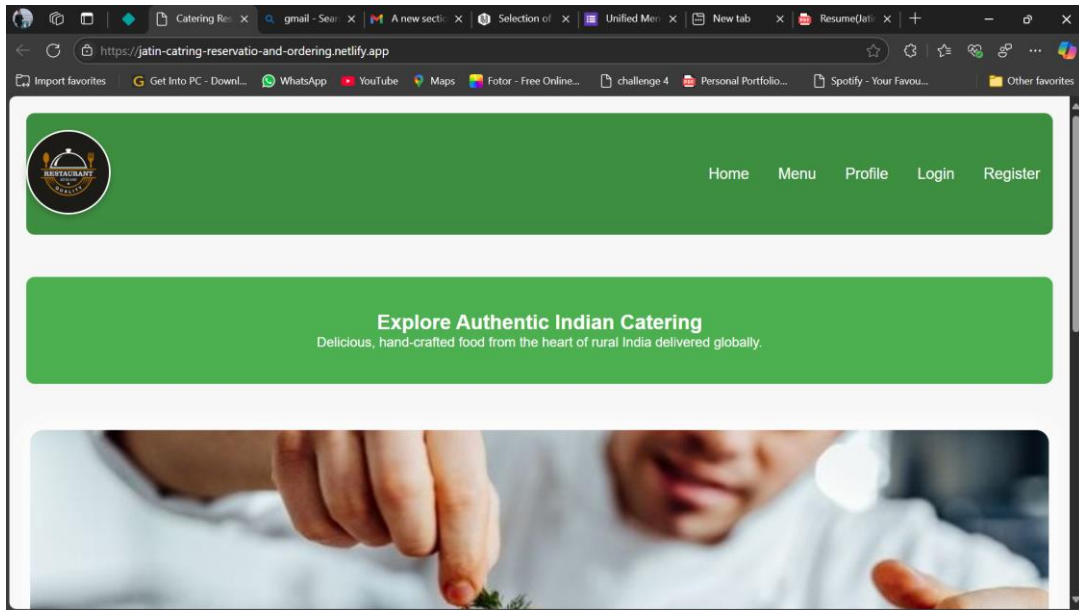

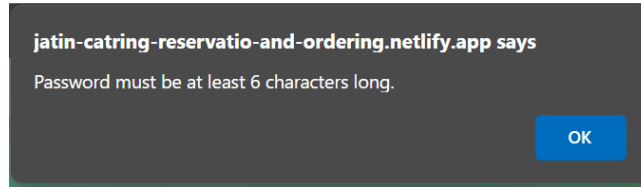

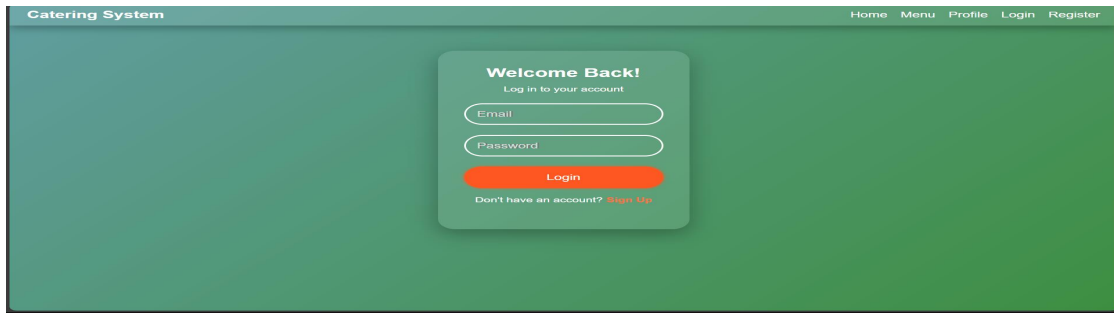

Input Fields:

Email: Validates proper email format.

Password: Requires at least 6 characters.

Submit Button: Redirects to homepage after successful login.

Sign-Up Link: Directs users to the registration page.

Slide 2: Functionality & Design

JavaScript Validation

Email Validation: Checks for valid email format.

Password Validation: Ensures minimum 6 characters.

Error Feedback: Alerts user if validation fails.

Redirect: Successful login redirects to the homepage.

Visual & Interactive Design

Responsive Layout: Navbar adjusts for mobile devices.

Floating Labels: Labels shrink and highlight when focused.

Animation: Form slides in for a dynamic experience.

Button Hover Effect: Changes color and glows on hover.

The screenshot displays a web browser window with the URL <https://jatin-catering-reservatio-and-ordering.netlify.app/register>. The page features a registration form titled "Create an Account" with the subtitle "Join us to explore amazing catering services!". The form contains four input fields: "Full Name", "Email", "Password", and "Confirm Password". A red "Register" button is positioned below the fields. A feedback message "Please fill out this field" is displayed next to the "Email" field. At the bottom, there is a link "Already have an account? Log In".

Slide 1: Register Page Overview

Form Features

Title and Instructions:

"Create an Account" encourages new user registration. Description highlights joining catering services.

Input Fields:

Full Name: Accepts user name.

Email: Validates for proper email format.

Password: Requires secure password creation.

Confirm Password: Ensures matching passwords.

Register Button:

Initiates the account creation process.

Validates inputs and provides feedback.

Login Link:

Redirects existing users to the login page.

Interactive Design

Responsive Layout:

Adjusts width and font size for mobile devices.

Floating Labels:

Dynamic labels move above input fields when focused.

Button Effects:

Button glows and changes color on hover for better interactivity.
